JEMMI EPRIADI

SOFTWARE DEVELOPER

ABOUT ME

A highly motivated Software Engineer with 3 years of experience in developing robust and scalable applications. Proficient in Full-Stack Development, with expertise in React, PHP Laravel, Spring Boot, & Go. Skilled in building web applications, fixing bug, & optimizing transaction processing systems for fintech and startup sector. Led a team to resolve critical production issues, improving productivity by 40%. Eager to take on new challenges and contribute my skills to innovative software solutions

EXPERIENCE

Backend Engineer
Astra Welab Digital Arta | August 2023 - Current
A fintech company leveraging big data and machine learning to deliver fast, high-quality credit scores and loan approvals.

- Built system development and online loan applications
- Integrated cashflow management system with 5 major banks and payment gateways in Indonesia to streamline transactions
- Designed auto-reject system for loan applications, cutting 40% manual review time and enhancing risk assessment accuracy.
- Investigated, resolved, and deployed production bugs, driving a 40% increase in system productivity.
- Developed and maintained payment system for customer.

Full Stack Engineer
Segari | June 2022 - February 2023
One of Indonesia's fastest-growing grocery e-commerce startups, providing a seamless marketplace for fresh, locally-sourced products.

- Developed and maintained web applications, specializing in both front-end and back-end to support business operations.
- Worked together with other Engineers to debug, maintained, and created features in the App.
- Created Promo Whitelist that is used by marketing team to register user for certain promo.
- Built SEO for marketing team to be used in customer web app.
- Collaborated with other Engineer to create page restructuring.

Go Language Bootcamp
Hacktiv8 | February 2021 - August 2021
Completed a 24-week Golang program at Indonesia's first coding academy, acquiring over 200 hours of hands-on training from SEA industry experts and contributing to 6 real-world projects.

- Developed RESTful APIs which enabled interactions across applications using Go Language.
- Coded databases to store data using PostgreSQL and connected it to the APIs.
- Developed backend operations using Gin and Gorm.
- Created RESTful APIs documentation to help users affectively use and integrate APIs using Swagger.
- Tested RESTful APIs in order to detect bugs and defects in early stages using POSTMAN.

PROJECTS

- Developed a Stock Management System with PHP and MySQL to track inventory levels, enabling real-time updates and improving accuracy.
- Created a blog application with user authentication, allowing users to write and upload blogs, using Laravel and MySQL.
- Developed a photography app with Laravel, connecting clients and photographers for seamless interaction via an integrated chat feature.
